Parts list

Operation Instruction

Knob Instructions

- Connect the power supply, turn the knob clockwise, the indicator under "0" is green, and then continue to turn the knob clockwise, the product begins to work and continue to fog.
- According to your needs, you can turn the knob to adjust the size of the fog.

Instructions for Use

Water Addition Method

There are two ways to add water:

- Remove the top cover.
- According to the picture on the right, put the water tank under the tap and add water.
- It is recommended to add pure water.

B

B

Two

Fill water into the water tank directly through the water injection port on the top cover. Please add water slowly to avoid water overflow on the desktop. Be careful not to add water to the fog outlet.

Adjust the Direction of The Fog Outlet

The direction of the fog outlet can be rotated 360° and can be adjusted according to your own needs, so that the fog is emitted in the direction you need.

Cleaning and Maintenance

Before cleaning the machine, the power switch must be turned off and the plug must be unplugged, and the product must be completely cooled before cleaning.

- After cleaning and maintenance, be sure to wait until fully dry to power use or collection.
- If not in use for a long time, please unplug the power cord. It is recommended to wrap it in its original packaging and store it in a dry place.
- It is forbidden to wash the fuselage directly with water. A soft cloth containing a little neutral detergent can be used to gently wipe the surface of the machine and then wipe dry.
- Do not use solvents such as gasoline.

Machine exterior cleaning

The outside of the machine can be cleaned directly with a clean soft wet cloth.

Machine internal cleaning

- Remove the top cover first.
- Then take out the fog guide tube and wipe the fog guide tube with a clean soft wet cloth.
- Finally, rinse the water tank with clean water.
- If there is scale on the atomization sheet, you can add a small amount of scaling agent, add water to soak for 1 hour, and then rinse with clean water, pour out the residual water in the direction of the arrow, and pay attention to avoid the outlet position.
- Be sure to press in place when installing the fog tube.

Service Guide

Specifications	
Model Number	9596
Working Voltage	230V~
Rated Frequency	50Hz
Rated Power	25W
Rated Mist Output	200ml/h
Noise Level	38dB(A)
Tank Capacity	4L

* The performance parameters in the table are measured by the factory and are for reference only.

Troubleshooting

If the humidifier still does not work properly after the following operations, contact the customer service center or local maintenance station.

Problem	Analysis of Causes	Possible Solution
The humidifier does not work	The power plug is not properly inserted There's no water in the tank	Plug in the power Add water to the tank
The gas blowing out has a bad smell	The water is dirty or stored for too long	Replace the clean water or clean the tank and atomization chamber
Humidification effect is not obvious	The air inlet net is blocked The water in the tank is flowing to the atomizing chamber, and the water in the atomizing chamber has not yet reached the normal working water level	Place the humidifier on a firm, flat surface Let the water for 1 minute before turning on
There is water in the tank but it shows a lack of water (flashing red or traffic lights alternately)	The machine tilts excessively at an angle, causing the water level in the sink to be judged to be too low, and the machine automatically protects and stops	Place the machine in a flat, firm place and keep it steady
The water level in the atomizing chamber is too high		Please remove the top cover, take out the mist guide tube, and pour out the water in the atomizing chamber. After installing the mist guide tube, add water to the tank, and be careful not to add water directly to the atomizing chamber.

Warranty

The warranty for this product is 1 year from the date of purchase. The warranty is void if the product is used for purposes other than its original purpose, or if the product is used for commercial/professional or rental use. The warranty does not cover damage resulting from natural conditions or damage resulting from improper storage. For warranty issues, contact your dealer.
